PRACTICAL:1

AIM: Introduction to Android, Introduction to Android Studio IDE, Creating a Project, Creating Android Virtual device, Android Application Overview. Simple “Hello World” program.

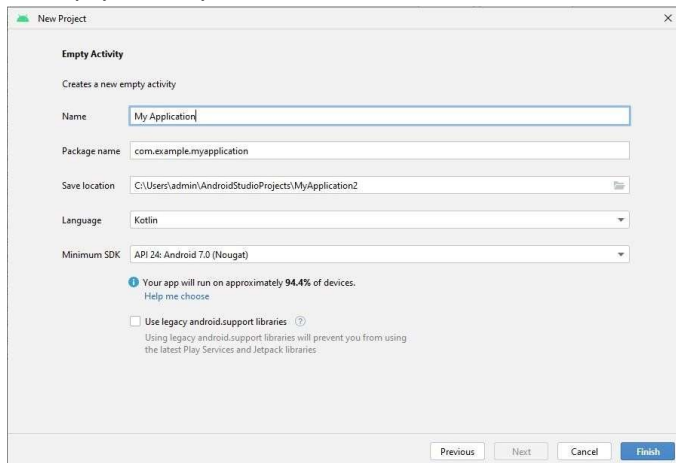

SOURCE CODE:

Hello World Program:

Launch your android studio, click on File>>New>>New Project,

Select Empty Activity and then next,

Provide your Application name and select language as Kotlin and then click on finish.

After few minutes your project will be ready.
activityMain.xml:

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />
```

MainActivity.kt:

```
package com.example.prac1

import androidx.appcompat.app.AppCompatActivity
import android.os.Bundle

class MainActivity : AppCompatActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_main)
    }
}
```

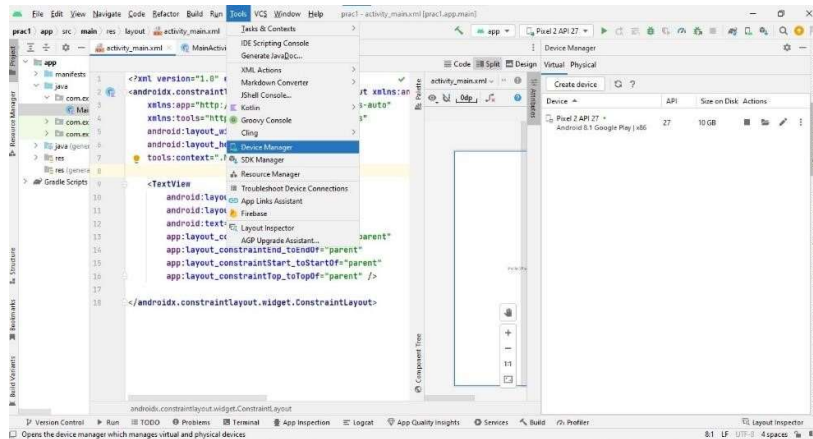

Output:

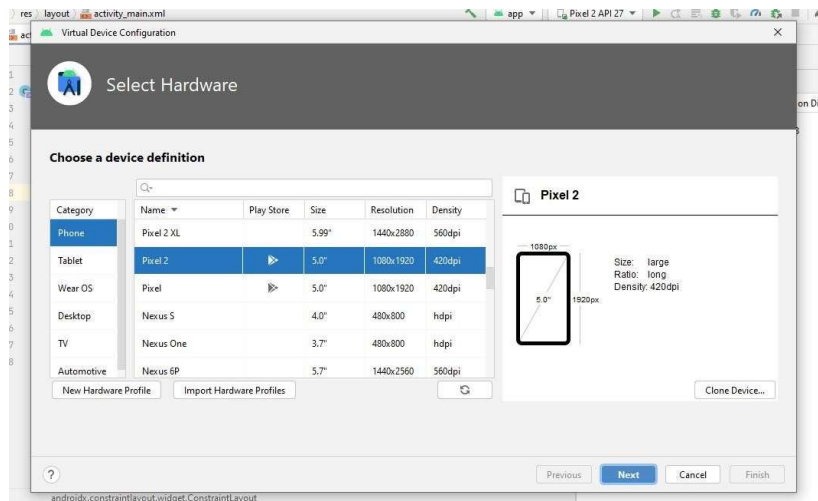

Creating Android Virtual device:

To open Device Manager:

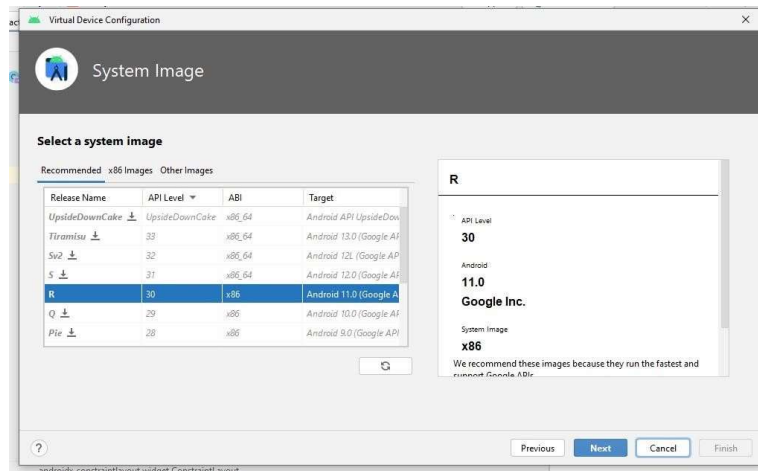

Click on tools>>DeviceManager

Click on Create virtual device>>Phone>>Pixel>>Next

Select S And download it. Accept the terms and condition and start downloading.

After downloading click on finish your virtual device is created.

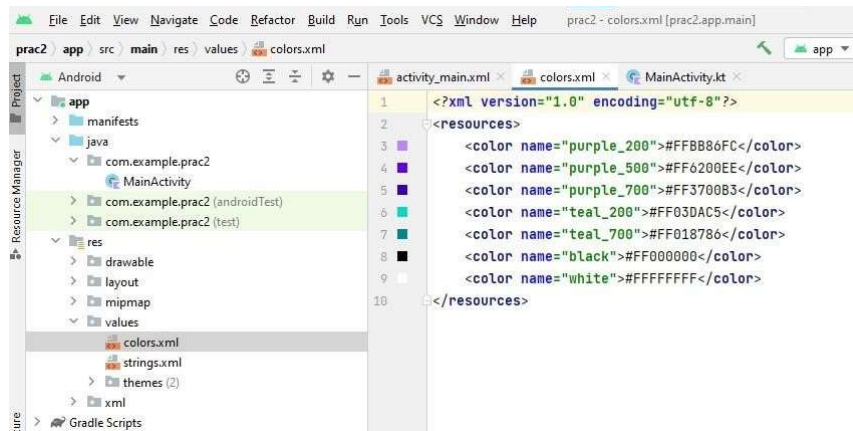

PRACTICAL:2

AIM: Android Resources: (Color, Theme, String, Drawable, Dimension, Image).

SOURCE CODE:

Color:

Launch your android studio and create new project. Under Android select res and under res select values and under values select colors.xml.

Add you color in colors.xml.

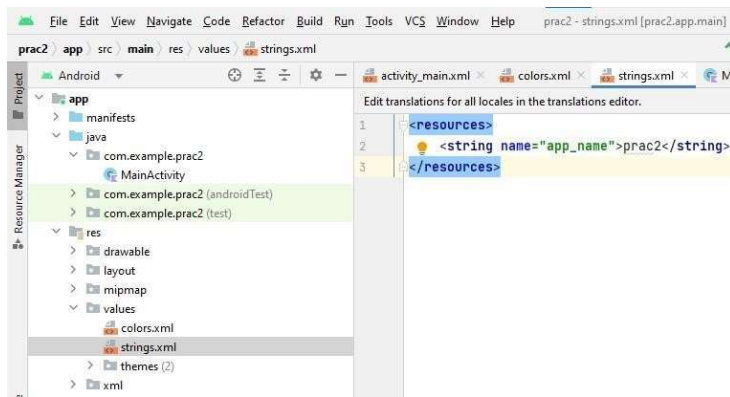

colors.xml:

```

<?xml version="1.0" encoding="utf-8"?>
<resources>
  <color name="RED">#C61818</color>
  <color name="purple_200">#FFB886FC</color>
  <color name="purple_500">#FF6200EE</color>
  <color name="purple_700">#FF3700B3</color>
  <color name="teal_200">#FF03DAC5</color>
  <color name="teal_700">#FF018786</color>
  <color name="black">#FF000000</color>
  <color name="white">#FFFFFFFF</color>
</resources>
    
```

String:

Launch your android studio and create new project. Under Android select res and under res select values and under values select strings.xml.

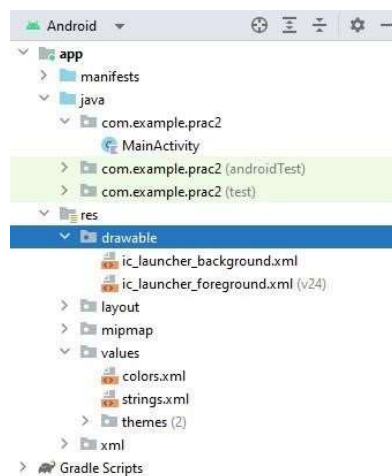

Add your string in strings.xml.

strings.xml:

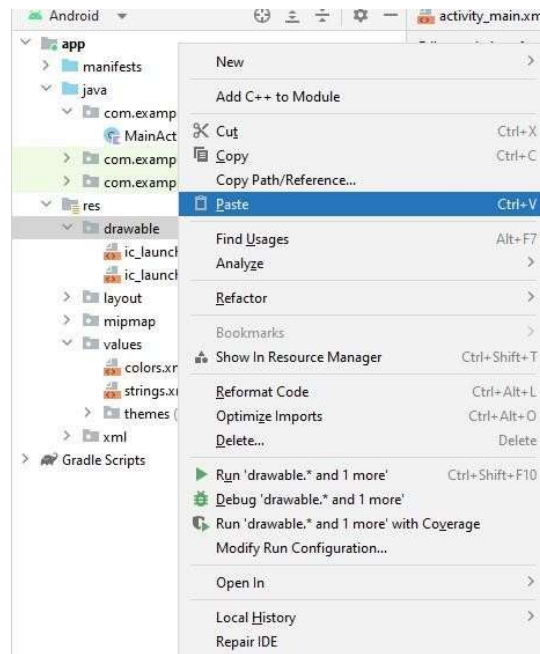

```
<resources>
    <string name="app_name">prac2</string>
    <string name="My_String">
        <item>1</item>
        <item>2</item>
        <item>3</item>
    </string>
</resources>
```

Drawable:

1. Right click on drawable folder

2. Copy the image if you want to create image drawable
3. Paste that image file inside the drawable folder

Note: to create drawable resource, right click on drawable folder and select drawable resource file.

Dimension, Image: activityMain.xml:

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout xmlns:
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="@drawable/img_3"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:background="@color/teal_700"
        android:text="EXPLORE"
        android:textColor="@color/purple_700"
        android:textSize="67dp"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent"
        app:layout_constraintVertical_bias="0.607" />
```

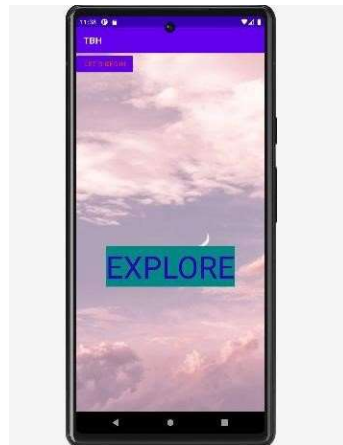

MainActivity.kt:

```
package com.example.prac2

import androidx.appcompat.app.AppCompatActivity
import android.os.Bundle

class MainActivity : AppCompatActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_main)
    }
}
```

Output:

Using ImageView: activityMain.xml:

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:orientation="vertical"
    android:layout_height="match_parent"
    tools:context=".MainActivity">
    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:background="@color/teal_700"
        android:text="EXPLORE"
        android:textColor="@color/purple_700"
        android:textSize="67sp"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />
    <Button
        android:id="@+id/button"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        tools:layout_editor_absoluteX="143sp"
        tools:layout_editor_absoluteY="435sp"
        android:text="LET'S BEGIN!!"
        android:textColor="@color/orange" />
    <ImageView
        android:layout_width="306dp"
        android:layout_height="400dp"
        android:src="@drawable/imgp2"
        android:layout_marginLeft="55dp" />
</LinearLayout>
```

Output:
